Professional Summary

Recent B.Tech graduate in Artificial Intelligence and Machine Learning with knowledge of Frontend Development, Python, SQL, Machine Learning, and Generative AI. Experienced in developing responsive web applications and AI-powered solutions. Passionate about building scalable software and continuously learning new technologies.

Technical Skills

Programming Languages: Python, Java, C, SQL

Frontend Technologies: HTML, CSS, JavaScript

AI & Machine Learning: Machine Learning, Deep Learning, NLP, Computer Vision, CNNs, Generative AI

Frameworks & Tools: TensorFlow, Keras, Scikit-Learn, Flask, FastAPI, Git, GitHub

Core Computer Science: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

AI Voice Assistant

- Developed an AI-powered voice assistant capable of understanding voice commands, answering queries, opening applications, and performing desktop automation tasks.
- Implemented speech recognition and text-to-speech functionality using Python.
- Technologies Used: Python, Speech Recognition, Pyttsx3.

Task Manager Web Application

- Developed a responsive task management application to create, update, organize, and delete daily tasks efficiently.
- Implemented task status tracking, priority management, and user-friendly interface components.
- Designed using modern frontend development practices for improved usability and performance.
- Technologies Used: HTML, CSS, JavaScript.

RAG Model Chatbot

- Built a Retrieval-Augmented Generation chatbot using Large Language Models and vector databases.
- Enabled context-aware responses through intelligent document retrieval.
- Technologies Used: Python, LangChain, FAISS, Gemini.

Portfolio Website

- Designed and developed a responsive personal portfolio website showcasing projects, skills, education, experience, and contact information.
- Implemented a modern user interface using frontend technologies.
- Technologies Used: HTML, CSS, JavaScript.

AI Resume Screener

- Developed an AI-based resume screening system using Natural Language Processing.
- Automated resume analysis and candidate-job matching.
- Technologies Used: Python, NLP, Scikit-Learn.

Internships

Machine Learning Intern — InternPe

Apr 2025 – Jun 2025

- Built and optimized Machine Learning models using Python.
- Performed data preprocessing and feature engineering.
- Evaluated model performance and improved prediction accuracy.

Cloud Programming Intern — EduSkills

Apr 2024 – Jun 2024

- Learned cloud computing fundamentals and deployment workflows.
- Worked with cloud storage, services, and security concepts.
- Explored practical cloud development environments.

Generative AI Intern — Vault of Codes

Mar 2025 – Apr 2025

- Explored Generative AI concepts and Large Language Models (LLMs).
- Learned RAG and LangChain for building context-aware AI systems.
- Gained exposure to Agentic AI workflows and automation techniques.
- Applied prompt engineering methods to improve AI-generated responses.

Education

Bapatla Institute of Engineering and Technology

2022 – 2026

Bachelor of Technology (Artificial Intelligence and Machine Learning)

CGPA: 8.57
